VMIA: Onboarding Process

CHALLENGE

MetaPM were engaged to help VMIA develop their Project Practitioner onboarding slide-deck and questionnaire so VMIA could demonstrate action against Price Waterhouse Cooper's recent audit requirement 5.6: 2/3: "Onboarding and lessons learned will be built into the PMF".

OUR APPROACH

MetaPM were required to produce 3 deliverables: Project team roles and responsibilities review, onboarding approach document, supporting material for the onboarding approach

PRINCE2 and P3O were both referenced when reviewing and providing suggested changes to the VMIA project practitioner/team member roles and responsibilities.

RESULTS

MetaPM successfully assisted in the delivery of this project. The Team at VMIA were thankful for the level of professionalism, critical thinking and ability to implement a positive UX within the quiz.
